Real GDP growth	Real retail sales growth	Real weekly rent	Consumer spending: Feb 2020 onward
+1.9% (RONZ) // / / / / / / / / / / / / / / / / /	12%           10%           10%           10%           10%           10%           10%           10%           10%           10%           10%           10%           10%           10%           10%           10%           11           12           11           12           11           12           11           12           11           12           14           15           16           17           18           19           20           21           12           13           14           15           16           17           18           19           20           21           22           24           25           26           21           21           21           21	\$616 (AKL) 700 500 500 500 500 500 500 500	<b>45.2%</b> (NZ) <b>60</b> <b>10</b> <b>60</b> <b>10</b> <b>10</b> <b>10</b> <b>10</b> <b>10</b> <b>10</b> <b>10</b> <b>1</b>
Auckland's real Gross Domestic Product (GDP) for the year ended June 2022 was 0.9% <i>lower</i> than for the year ended June 2021; in the rest of New Zealand, the annual change was a 1.9% <i>rise</i> (see notes).	Real retail sales* for the year ended June 2022 were 1.0% <i>lower</i> than for the year ended June 2021; in the rest of New Zealand, the annual change was a 1.6% <i>fall</i> .	The average (not median or geometric mean) real weekly rent* for the month (not year) of August 2022 was \$616 (6.1% <i>lower</i> than August 2021, and similar to six years ago); for the rest of New Zealand, the figure was \$517 (0.7% <i>lower</i> than August 2021).	In Auckland, consumer spending** using Paymark EFTPOS for the week ended 23 October 2022 was 4.0% <i>lower</i> than the same week in 2019 (not merely two years prior, when Covid-19 was already affecting spending). The equivalent figure for New Zealand (including Auckland) was a 5.2% <i>increase</i> .
Note: Real GDP refers to GDP in constant 2021 dollars, to remove inflation. Lockdowns due to Covid-19 affect both the 2021 and 2020 years. Covid-19 lockdown level 3 began on 23 March 2020. Latest and historical real GDP figures are modelled estimates, and subject to revision. Source: Infometrics, Regional Economic Profile/Quarterly Economic Monitor.	* Real retail sales have been calculated by converting previous quarters' dollars to the latest quarter's equivalent dollars using the quarterly consumer price index (CPI), to remove inflation. Note: These figures exclude non-retail activity captured elsewhere in the retail sales survey. Source: Stats NZ, Retail Sales (quarterly); Stats NZ, CPI (quarterly); Auckland Council (RIMU), calculations.	<ul> <li>* Real rents have been calculated by converting previous quarters' dollars to the latest quarter's equivalent dollars using the quarterly consumer price index (CPI), to remove inflation.</li> <li>Note: Dwelling size and quality may vary over time. Rent is for new rental bonds lodged each month with Ministry of Business, Innovation and Employment, for housing tenancies with private sector landlords (so excludes state housing). Data covers only new bonds, so excludes existing leases from earlier periods whose rent has not changed, or has changed but with no revision to the bond. It also excludes new leases where no bond is lodged. Data is subject to minor revisions.</li> <li>Source: Ministry of Business, Innovation and Employment, Regional Rental Prices (monthly); Stats NZ, CPI (quarterly); Auckland Council (RIMU), calculations.</li> </ul>	<ul> <li>**These figures are from nominal (not 'real') dollars, so include the effects of inflation.</li> <li>Note: Consumer spending here refers to both residents and domestic and international visitors, but only when purchasing at merchants using Paymark EFTPOS systems. It covers more than 70% of the EFTPOS transactions around the country. (This 70% is not evenly distributed across regions in New Zealand).</li> <li>It excludes direct online purchases, cash purchases and payments via alternative payment networks, such as Verifone (which processes some major businesses such as Countdown).</li> <li>Source: Marketview-Paymark, cited in Ministry of Business, Innovation and Employment, COVID19 Response – card spend - regional.</li> </ul>

The median (not average) sale price of houses sold in Auckland in the month of September 2022 was \$1,045,000 (15% <i>lower</i> than a year prior, in real* dollars, and <i>similar</i> to six years ago). The total number of houses sold in Auckland in the year ended September 2022 was 23,506, a third <i>lower</i> than the peak in July 2021 (36,326). Prices and sales both falling, suggests falling demand as the main driver.	The total number of new dwellings consented in Auckland in the year ended September 2022 was 21,985 (11% <i>higher</i> than year ended September 2021, but only slightly <i>higher</i> than March 2022 to August 2022). The real value* of new non-residential buildings consented in Auckland in the year ended September 2022 was \$2,959 million (7% <i>higher</i> than year ended September 2021 and slightly <i>above</i> recent months, but slightly <i>below</i> the February 2019 record).	The number of people employed in Auckland in the quarter (not year) ended June 2022 was 2.0% <i>higher</i> than the June 2021 quarter. The unemployment rate in Auckland in the quarter ended June 2022 was 3.4%, a <i>fall</i> since June 2021 (4.1%) and the lowest June rate since 2005.	In Auckland, the Westpac McDermott Miller Consumer Confidence Index (CCI) for the September 2022 quarter was still only 87.2 (despite a 13.6-point <i>rise</i> since June 2022 (73.6)). The NZIER QSBO in Auckland for the September 2022 quarter showed a net 50.4% of businesses expecting a <i>worsening</i> in the general business situation over the next three months.
<ul> <li>* 'Real' prices for previous months are calculated by inflating previous quarters' dollars to the latest quarter's equivalent dollars, using the quarterly consumer price index (CPI).</li> <li>Notes: The data for 'houses' covers actual sales during the period. Size and quality may vary over time. 'Houses' includes all dwelling types (eg apartments and flats), not just free-standing houses, but excludes sales of undeveloped land. 'Price' is real actual sale price* (not just listed). REINZ revises recent data each month for prices and numbers sold.</li> <li>Source: Real Estate Institute of New Zealand (REINZ), Monthly Property Report (monthly – from website); Stats NZ, CPI (quarterly); Auckland Council (RIMU), calculations.</li> </ul>	<ul> <li>* 'Real' values for previous months have been calculated by inflating previous quarters' dollars to the latest quarter's equivalent dollars, using the capital goods price index (CGPI) for non-residential buildings</li> <li>Note: Projects consented are not necessarily commenced or completed. "New" refers to new buildings (i.e. excludes alterations and additions). Residential number is new dwellings consented, which will exceed new residential buildings as some buildings have multiple dwellings; similarly, it will differ from new residential building consents issued, as some consents are for multiple buildings.</li> <li>Source: Stats NZ, Building Consents (monthly); Stats NZ, CGPI (quarterly); Auckland Council (RIMU), calculations.</li> </ul>	<ul> <li>Note: Covid-19 lockdown level 3 began on 23 March 2020, plus wage subsidies, which both affect official unemployment.</li> <li>Historical data for 2013 to 2020 was re-rebased by Stats NZ in October 2020 to match latest revisions of historic population estimates.</li> <li>Both datasets are from a survey (HLFS) so are subject to error margins. Respondents define their own employment status. The survey covers all people aged 15+, so includes school pupils 15+ and people over 65, who might or might not have - or be actively seeking - a job.</li> <li>Source: Stats NZ, Household Labour Force Survey (HLFS) (quarterly).</li> </ul>	Note: Left axis is for CCI (consumers: index). For the CCI, a score of greater than 100 shows more optimism than pessimism. Right axis is for QSBO (businesses: net %). The QSBO calculates a net figure as (% of businesses expecting an improvement) minus (% expecting a worsening). QSBO data used here is not the seasonally adjusted version. Source: Westpac McDermott Miller, Regional Consumer Confidence Index (CCI) (quarterly – published, but proprietary); New Zealand Institute of Economic Research (NZIER), Quarterly Survey of Business Opinion (QSBO) (quarterly – by subscription).
